

VANUATU RURAL ELECTRIFICATION PROGRAM

Half price subsidies for “Plug and Play” solar home systems

Published and printed by the Department of Energy.
This catalogue supersedes Issue 3.

PRODUCT CATALOGUE

PROGRAM INFORMATION

Quality solar products are now more affordable.
With the VREP subsidy, you pay only half.

How does the half price subsidy work?

The Department of Energy has secured funding from the New Zealand Government to help rural people access home solar systems at an affordable price.

The “Plug and Play” solar systems listed in this catalogue are available now from Vanuatu Rural Electrification Program (VREP) vendors.

The Department of Energy, through funding from the New Zealand Government, has paid half for these products. Now you only need to pay half to own a quality solar system. Only products listed in this catalogue are eligible for the half price subsidy.

Who is eligible?

The VREP subsidy is now available to all households, aid posts and community halls through out Vanuatu.

How do I buy the products?

- Only products listed in this catalogue are eligible for the half price subsidy.
- Select the product (or products) from this catalogue you think will suit your requirements and budget.
- Contact the Vendors selling those products at the distribution point nearest to your location.
- It is recommended that you do obtain prices for similar products from the different vendors.

PROGRAM INFORMATION

Payment Options

- 1 **Pay Outright:** Beneficiary pays the full purchase price amount in cash.
- 2 **Lay-By:** Beneficiary pays required deposit and pays off the outstanding amounts in instalments within a specified period. The beneficiary will own the product after the final instalment is made.
- 3 **Hire Purchase:** Beneficiary takes possession of the VREP product upon paying the required deposit and completes paying the remaining outstanding through a series of instalments. Ownership of the product remains with the vendor until the final instalment is paid.
- 4 **Pay-As-You-Go (PAYG):** Beneficiary takes possession of the VREP product and a product unlock code is provided upon the first payment. The code is then entered and product is used until code expires. The product is permanently unlocked after the beneficiary makes the final payment.

Note: Follow payment option numbering on product specification page (pg 4-6) to see which options are available for which product.

What happens when I buy a product?

- You will only pay 50% of the price.
- The receipt will show the full price and the discounted price you paid.
- The seller must explain to you:
 - How to install the system,
 - The warranty information,
 - What to do if there is a problem,
 - How to safely dispose of the battery when purchasing a new one.
- You must sign the receipt and a declaration form or signed up agreement for payment plan that the above has been explained.
- You will provide the following information to the Vendor:
 - Name of beneficiary;
 - Name of head of household;
 - Name of aid post or community hall; (if relevant)
 - Village and Island name and any other relevant details for locating the household, aid post or community hall; and

- Contact details-(preferably a mobile phone number).
- In the weeks after purchasing the system you might be contacted by an Independent Verification Agent whose role it is to verify that the vendor has made the sale when they are applying for their subsidy.

2 year warranty

- The products in this catalogue are covered by a two year warranty. If a product has failed it should be replaced within the warranty period.
- If you have a problem with the products, you must contact the Vendor/Seller. They will ask you some questions to gain a full understanding of the problem.
- If you get no satisfaction with Vendor/Seller after a reasonable period, then contact:
VREP Program Manager,
Department of Energy
Telephone: +678 33425
Mobile: 7101141
Email: vrep@vanuatu.gov.vu
